

Aditya Yadav

Lucknow, Uttar Pradesh, India

+91-7007302928 — adityadyadav9792@gmail.com — LinkedIn — GitHub

Professional Summary

Analytically-driven B.Tech Computer Science (Artificial Intelligence) student with proven expertise in business intelligence, data analytics, and dashboard development using SQL, Excel, and Power BI. Highly passionate about digital growth strategies, user lifecycle management, and customer behavior analytics. Eager to leverage strong problem-solving skills and a bias for action to optimize user acquisition, retention, and cross-sell opportunities within Paytm's insurance growth ecosystem.

Education

University of Lucknow

B.Tech in Computer Science & Engineering (Artificial Intelligence)
CGPA: 8.0/10

Lucknow, India
2023 – 2027

Intellipaat × IIT Indore

Advanced Certification Program in AI & Data Science

Ongoing

Technical Skills

Growth & Business Analytics: Customer Lifecycle Analytics, Funnel Optimization, Cohort Analysis, Customer Segmentation, Competitor Benchmarking, A/B Testing, Market Research

Data & BI Tools: Excel, Google Sheets, Power BI, Tableau, Power Query, DAX, KPI Reporting, Data Modeling

Programming & Infrastructure: SQL, Python, C++, C, Git, GitHub, Streamlit, Docker, AWS

Projects

Insurance Growth Analytics Platform (Ongoing) — Power BI, SQL, Excel

- Developing an end-to-end data analytics platform focused on customer acquisition, retention metrics, and churn risk forecasting within the digital insurance domain.
- Engineering interactive tracking dashboards for growth campaign performance, cohort retention, and user lifecycle segments to identify strategic cross-sell opportunities.
- Conducting competitor benchmarking and market trend analysis to embed data-driven growth strategies and optimize acquisition funnels.

Retail Customer Purchase Analytics Dashboard — Power BI & SQL

- Built a comprehensive customer purchasing behavior dashboard tracking granular demographics, regional spending trends, and conversion funnels.
- Implemented Row-Level Security (RLS) and automated data workflows to distribute regular performance insights seamlessly.
- Utilized advanced Power Query and DAX data modeling to synthesize complex business datasets into clear leadership KPIs.

University Admissions Analytics Dashboard — Power BI & Excel

- Designed user demographic and application trend dashboards using advanced data transformation methodologies (merges, pivots, conditional logic).
- Developed executive geospatial summaries to guide user acquisition strategies and operational fund allocation patterns.

Leadership & Responsibilities

President, Student Council — Faculty of Engineering & Technology

2025 – Present

- Lead large-scale student initiatives, collaborating effectively with cross-functional university administration bodies on long-term operations.

- Manage multi-tiered volunteer teams, driving engagement and campaign execution for institutional events.

Student Coordinator — RAASHEE'25 International Conference

- Streamlined operations, digital registrations, and stakeholder communications for a large-scale international conference with 250+ global participants.
- Facilitated cross-functional collaboration between executive committees and external delegates to ensure project delivery.

Organizing Head — AAGAAZ 2026 Sports Fest

- Directed event logistics, registration funnels, and real-time operations for a multi-college festival by leading diverse student teams.

Experience

AI & Prompt Engineering Intern — VaultofCodes

Jun 2025 – Jul 2025

- data-driven experimentation and A/B testing of prompt workflows to optimize product output quality and user experience.
- Analyzed user performance metrics and feedback loops to track engagement and uncover optimization insights.
- Collaborated closely with cross-functional product, marketing, and engineering teams to streamline digital workflows and technical documentation.
- Prepared regular performance reports and iterative analytical insights for leadership review.

Research Publication

Co-authored research paper on *Industry 4.0 and Smart Manufacturing Systems*, presented and published in conference proceedings associated with IIT Roorkee.

Relevant Coursework

Data Analytics • Probability & Statistics • Database Management Systems (DBMS) • Machine Learning • Artificial Intelligence • Data Structures & Algorithms
